

NAME

dir, vdir — **ls -Cb, ls -lb**

SYNOPSIS

dir [**ls** arguments]...

vdir [**ls** arguments]...

DESCRIPTION

dir executes **ls -Cb**.

vdir executes **ls -lb**.

SEE ALSO

ls(1)

STANDARDS

Matches the GNU system.

HISTORY

These appear fully formed in the earliest revision of GNU fileutils, and don't seem to be matching anything in particular; CP/M and derivatives have a **dir**?
