

NAME

link — create file link

SYNOPSIS

link *existing new*

DESCRIPTION

Creates *new*, which is the same file as *existing*.

Equivalent to running **link**(*existing*, *new*).

You're most likely looking for `ln(1)`.

EXIT STATUS

1 if `link(2)` failed.

SEE ALSO

`ln(1)`, `unlink(1)`, `link(2)`

STANDARDS

Conforms to IEEE Std 1003.1-2024 ("POSIX.1").

HISTORY

Created in Version 2 of the Single UNIX Specification ("SUSv2"), marked as an XSI extension.
